FixMate AI

The Brightest Way to Fix Your PC.

ABOUT US

We're a team of five dedicated second-year engineering students with a shared passion for technology and innovation. At FixMate AI, we're building an intelligent system troubleshoot assistant that simplifies tech troubleshooting. With skills across AI, scripting, reasoning, and maintaining device privacy, we aim to make a better fix for your device smarter, safer, and more user-friendly.

PROBLEM OVERVIEW

Most users struggle with technical issues like WiFi failures, Bluetooth errors, or system related problems. The typical fix involves searching forums, watching tutorials, or running risky commands — a frustrating and error-prone process, especially for non-technical users. Traditional support is slow, complicated, and rarely personalized.

There's a gap between everyday users and reliable system repair and that's exactly what FixMate AI is here to fix.

Why FixMate AI?

Fixing an issue in our system should not be complicated with dangerous commands.
FixMate AI is designed to be your intelligent desktop assistant — diagnosing, fixing, and learning from problems using AI, in offline. No more confusing commands or endless searching. Just clear solutions that work. Whether you're tech-savvy or not, FixMate AI brings smart, secure, and self-repairing support right to your desktop.

Core Features

- Intelligent AI Diagnosis – Quickly Reasons issues with precision and insight.
- Reliable Offline Troubleshooting – Diagnoses and resolves problems without internet connectivity
- User-Friendly Interface – Offers an intuitive, easy-to-navigate design suitable for all user levels.
- Optimized for Low-End PCs – Delivers exceptional performance even on systems with limited resources.
- Advanced Privacy & Security – Keeps your data protected, secure, and local.

How It Works:

Using FixMate AI is as simple as describing your problem. Just type something like "My WiFi isn't connecting", and FixMate AI's built-in AI Model understands the issue reasons for quick fixes, runs smart system checks in the background, and identifies the root cause. Based on its knowledge, it applies a safe solution instantly. If needed, it asks for permission to run advanced fixes and always gives you the option to roll back.

Our promises

FixMate AI is built with user trust at its core.

- Privacy First: Your data stays on your device. Nothing is uploaded or shared without your consent.
- Secure by Design: All actions follow a signed allow-list and require user approval for elevated tasks.
- FixMate AI maintains a Logs section where you can verify what changes it makes in your system.

With FixMate AI, you remain in control — always.
